LANGUAGES

French (mother tongue)

English (professional competence)

German (fluent, self-assessed at B1; class level C1 taken in 2016 at the *Goethe Institute*; private lessons level B2/C1 in 2021)

METHODS

SCRUM and Agile structure

Version control system (Git/GitHub)

Experience with Jira, TEAMS, Trello...

TECHNICAL SKILLS

Frontend

- ❖ HTML 5
- ❖ CSS3 and Responsive Web Design
- ❖ Javascript, specialised in the React Framework

Backend

- ❖ Node.js (Express)
- ❖ Creation and management of SQL (Postgres) and NoSQL (MongoDB) databases

Transversal

- ❖ Basics of *Test Driven Development* and *Typescript*
- ❖ *Opquast* certification for quality control in Web projects (950/1000, "Expert")

PROJECTS (see also <https://jeanhautier.codes/>)

As a web developer in training:

memOria is a flash-card application designed for developers. They can create cards with syntactically coloured code depending on the language (memoria-oclock.netlify.app/).

What's that is a community platform to help developers better describe their code (<https://whatsthat.netlify.app/>).

As a coordinator/supervisor at UNESCO, working with external web developers:

- ❖ a **networking platform** for 200 institutions from 150 countries ([video presentation](#))
- ❖ **two databases**: one compiling [promising practices](#), and one of [terms](#) used internationally

2012 (April - August) : INSTITUT FRANÇAIS DE BONN

Assistant to the direction (internship)

- ❖ Day-to-day management of the institute (reception, logistical support etc.)
- ❖ Reorganisation of the library based on its digital database

PROFESSIONAL SKILLS

Building projects in a multicultural team

I have always worked in multicultural teams, and collaborated with partners from all over the world. I have learned to listen, to build consensus to move forward together, and to carry out projects in unique contexts (cultural, material, financial).

Analyse and choose the right tools

My education and professional background have taught me to take the time to analyse a problem and identify a need. A good analysis, built in a team, helps me to choose the tools and maintain the integrity of the project, whatever concessions the context may require.

Managing a project

By delivering a variety of products - conferences, databases, publications - I have learned to switch between different teams and working methods while meeting my deadlines.
